

Enter to Win
the Second Annual...

22nd Annual Alberta Pharmacy Technician Conference

You are committed to the safe handling of hazardous drugs and have done everything possible to make sure that pharmacists in your facility minimize the risk of accidental exposure. For that we applaud you. ICU Medical, makers of the ChemoCLAVE[®] System—the world's only needlefree closed system transfer device (CSTD)—and the Pharmacy Technician Society of Alberta (PTSA) would like to give you the opportunity to showcase to your peers the work you have done and win a free registration to the 22nd Annual Alberta Pharmacy Technician Conference, a full year's membership to the PTSA, and an iPod. Here's how to enter:

- **Prepare a Brief Safe Handling Practices Paper** outlining the safe handling procedures you have put in place and the training you have provided to the pharmacy staff and their response to the initiative. Or, outline areas that are of concern to you that you feel have not been addressed, and provide some creative "out of the box" suggestions as to how safety could be improved. Be sure to highlight the personal protective equipment, environmental controls, and other safety procedures you would implement or would recommend as well as the ways in which you will measure safety improvements.
- **Submit the Paper to ICU Medical, Inc. by July 1st 2012.** All submitted papers will be evaluated by a team of safe handling experts who will determine the winner based upon the creativeness and detail of the procedures, training, and the results obtained.

Enter by July 1st, 2012, to win a free registration to the 22nd Annual Alberta Pharmacy Technician Conference in September 2012, a full year's membership to the PTSA, and an iPod!

Send your entry electronically to-
Neil Perrett, Canadian National Manager, ICU Medical, Inc.
